INTER-AMERICAN INVESTMENT CORPORATION

Financial Statements December 31, 2018

KPMG LLP Suite 12000 1801 K Street, NW Washington, DC 20006

Independent Auditor's Report

The Board of Governors Inter-American Investment Corporation:

We have audited the accompanying financial statements of Inter-American Investment Corporation (the Corporation), which comprise the balance sheets as of December 31, 2018 and 2017, and the related statements of income, comprehensive income/(loss), changes in capital and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Inter-American Investment Corporation as of December 31, 2018 and 2017, and the results of its operations and its cash flows for the years then ended in accordance with U.S. generally accepted accounting principles.

Notes to the Financial Statements

Entity and Operations

The Inter-American Investment Corporation (the IIC or IDB Invest), an international organization, was established in 1986 and began operations in 1989, and is owned by its member countries. These members include 26 regional developing member countries, all of which are located in Latin America and the Caribbean (the Regional Developing Member Countries), and 19 members from other countries. In November 2017, the IIC adopted a new brand and now refers to itself as IDB Invest. This rebranding did not entail a change in the legal name. The purpose of IDB Invest is to promote the economic development of its Regional Developing Member Countries by encouraging the establishment, expansion, and modernization of private enterprises in such a way as to supplement the activities of the Inter-American Development Bank (IDB). IDB Invest provides financing through loans, investments in debt securities, guarantees and equity investments where sufficient capital is not otherwise available on adequate terms in the market. IDB Invest also arranges additional project funding from other investors and lenders, either through joint financing or through loan syndications, loan participations and guarantees. In addition, IDB Invest provides financial and technical advisory services to clients. IDB Invest is an autonomous international organization and a member of the Inter-American Development Bank Group (the IDB Group), which also includes the IDB and the Multilateral Investment Fund (now commercially known as IDB Lab).

1. Basis of Presentation

These financial statements are prepared in accordance with generally accepted accounting principles in the United States of America (US GAAP). References to US GAAP issued by the Financial Accounting Standards Board (FASB) in these notes are to the FASB Accounting Standards Codification, sometimes referred to as the Codification or ASC.

All amounts presented in the accompanying financial statements and notes are expressed in United States dollars (US\$ or \$), which is IDB Invest's functional and reporting currency.

2. Summary of Significant Accounting Policies

Use of estimates - The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. A significant degree of judgment has been used in the determination of the adequacy of the allowance for loan and guarantee losses, the evaluation for other-than-temporary impairment on available-for-sale and held-to-maturity debt securities and equity investments, the fair value of investment securities, loan and equity investments, debt securities, borrowings, and the determination of the net periodic benefit cost from pension and postretirement benefit plans and the present value of benefit obligations. There are inherent risks and uncertainties related to IDB Invest's operations including the potential impacts of changing economic conditions on IDB Invest's clients and the global investment markets that could have an adverse effect on the financial position of IDB Invest.

Cash and cash equivalents - Highly liquid investment instruments purchased with original maturities of three months or less, other than those held as trading securities, are considered cash equivalents. IDB Invest may hold cash deposits in excess of Federal Deposit Insurance Corporation (FDIC) insured limits. In addition, cash and cash equivalents include restricted cash related to third party project origination costs.

Investment securities - As part of its overall portfolio management strategy and to provide liquidity and resources to finance development related investments, IDB Invest invests in debt securities issued by corporations, governments, supranationals and agencies. These investments may include fixed and floating rate bonds, notes, bills, certificates of deposit, commercial paper and mutual funds.

Investment securities are classified based on management's intention on the date of purchase. Purchases and sales of investment securities are recorded on a trade date basis. The first-in, first-out method is used to determine the cost basis of securities sold. The investment portfolio classified as trading is recorded at fair value with unrealized gains and losses reported in income from Investment securities. The investment securities

¹ References to captions in the financial statements are identified by the name of the caption beginning with a capital letter every time they appear in the notes to the financial statements.

Notes to the Financial Statements

classified as available-for-sale are carried at fair value with net unrealized gains or losses included in Other comprehensive income/(loss). Interest and dividends on securities, amortization of premiums, accretion of discounts, and realized gains and losses from both trading and available-for-sale debt securities are reported in income from Investment securities.

Available-for-sale securities are evaluated for other-than-temporary impairment. IDB Invest considers various factors in determining whether a decline in fair value is other-than-temporary including the issuer's financial condition, the effects of changes in interest rates or credit spreads, the expected recovery period, and other quantitative and qualitative information. The evaluation of securities for impairment is intended to determine whether declines in fair value of investment securities should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions and future changes in assessments of the aforementioned factors. It is expected that such factors will change in the future. For impairments that are deemed to be other-than-temporary, the credit portion of the loss is recognized in earnings and the non-credit portion is recognized in Other comprehensive income/(loss). However, when impairment is recorded because IDB Invest intends to sell or considers it more likely than not that it will be required to sell the securities before the recovery of the amortized cost the full impairment is recognized in earnings.

Loans - Loans are recorded as assets when disbursed and are carried at the unpaid principal amount outstanding adjusted for allowance for loan losses or carried at fair value.

IDB Invest classifies its loan portfolio as either financial institution loans or corporate loans. Corporate loans are extended to enterprises operating in a variety of sectors further detailed in Note 4. IDB Invest's loans may be secured or unsecured. Secured loans may be guaranteed by mortgages and other forms of collateral security, as well as third-party guarantees. IDB Invest also enters into insurance contracts as a form of credit enhancements that are generally not transferable.

Allowance for loan and guarantee losses - The allowance for loan and guarantee losses represents management's estimate of probable incurred losses in the related portfolio as of the balance sheet date and is recorded as a reduction of loans and as a contingent liability for guarantees. Changes in the allowance for loan and guarantee losses are recorded through the (Provision)/release of provision for loan and guarantee losses in the statement of income. The estimate takes into consideration the rating of each loan or guarantee counterparty which incorporates qualitative and quantitative elements including country risk, industry risk as well as financial risk and the loss given default based on Standard and Poor's (S&P) methodology. IDB Invest believes that the allowance for loan and guarantee losses is adequate as of the balance sheet date; however, future changes to the allowance for loan and guarantee losses may be necessary based on changes in any of the factors discussed herein.

The allowance for loan losses reflects estimates of both probable losses inherent in the portfolio but not yet specifically identifiable (collective provision) and identified probable losses (specific provision).

As mentioned above, the collective provision is established via an internal credit risk classification system that estimates the probable loss inherent in the portfolio based on various analyses. The collective provision for each loan exposure considers: (i) the probability of default rate for each risk category and the applicable loss emergence period; (ii) the amount of credit exposure in each of these categories; and (iii) the loss given default (LGD) ratio.

Each loan is individually monitored and rated by assigning an applicable probability of default rate and an LGD ratio on at least an annual basis.

Probability of Default — A scorecard is completed that contemplates a variety of borrower-specific considerations including, but not limited to: country risk, industry risk, market risk, competitive position, any sponsor guarantees and support agreements, as well as an analysis of the financial performance and other information provided by the borrower. The scorecard result produces an internal risk rating that is comparable to a long-term issuer credit rating published by S&P. The credit rating is mapped to a probability of default (PD) according to the latest S&P Annual Global Corporate Default Study and Rating Transitions publication, as approved by management.

Notes to the Financial Statements

• Loss Given Default — IDB Invest calculates an LGD ratio for each individual loan or guarantee. A scorecard is completed that contemplates a variety of transaction-specific considerations for each loan or guarantee exposure, including, but not limited to: the seniority of the instrument, the collateral type, third party guarantees and jurisdiction risk or creditor rights under the law of the respective country. The scorecard produces an LGD ratio that is calibrated using empirical evidence of over 20 years of historical loss data collected by S&P.

IDB Invest utilizes these external inputs to calculate the allowance for loan losses because of IDB Invest's limited historical loss experience, relatively small volume of business, and variation in loan size, sector and geographic dispersion of the portfolio.

For the specific provision and for loans evaluated for impairment, the determination of the allowance for identified probable losses reflects management's best judgment of the creditworthiness of the borrower and is established based upon the periodic review of individual loans. This estimate considers all available evidence including, as appropriate, the present value of the expected future cash flows discounted at the loan's contractual effective rate, the fair value of collateral less disposal costs, and other market data. Because of the purpose of IDB Invest and the nature of the loans, secondary market values are usually not available.

IDB Invest considers a loan impaired when, based on current information and events, it is probable that IDB Invest will be unable to collect all amounts due according to the loan's contractual terms. Information and events considered in determining that a loan is impaired include the borrower's financial difficulties, the borrower's competitive position in the marketplace, the risk associated with the underlying collateral, the willingness and capacity of the sponsor who organized the project to support the investment, the borrower's management team, as well as geopolitical conflict and macroeconomic crises.

Further, a loan modification is considered a troubled debt restructuring when the borrower is experiencing financial difficulty and IDB Invest has granted a concession to the borrower that it otherwise would not grant in order to maximize recoveries on the existing loan. A loan restructured under a troubled debt restructuring is considered impaired, until its extinguishment, but it does not need to be disclosed as such after the year it was restructured, if the restructuring agreement specifies an interest rate equal to or greater than the rate that IDB Invest was willing to accept at the time of the restructuring for a new loan with comparable risk, and the loan is not impaired based on the terms specified in the restructuring agreement. Additional information is included in Note 4.

Loans are written off when IDB Invest has exhausted all possible means of recovery, by reducing the loan and related allowance for loan losses. Such reductions in the allowance are partially offset by recoveries, if any, associated with previously written off loans.

Revenue recognition on loans - Interest and fees are recognized in the periods earned. A loan is generally placed in nonaccrual status when collectability is in doubt or payments of interest or principal are past due more than 90 days. IDB Invest does not accrue income on loans in nonaccrual status, and any uncollected interest accrued on a loan placed in nonaccrual status is reversed out of income and is thereafter recognized as income when the payment is received. The loan is returned to accrual status once management has concluded that the borrower's ability to make periodic interest and principal payments has been demonstrated. Interest previously not recognized but capitalized as part of a debt restructuring is recorded as deferred income, included in Accounts payable and other liabilities in the balance sheet, and credited to income only when the related principal is received. Such capitalization is considered in the computation of the Allowance for loan losses in the balance sheet.

Net loan origination fees and costs, included in Receivables and other assets in the balance sheet, are deferred and amortized over the life of the loan on a straight-line basis offset against Fees and other income in the statement of income, which approximates how costs would be reflected under the effective interest method.

Equity investments - Equity investments include ownership interests in limited partnerships and similar fund structures (LPs) and equity investments primarily in small and medium-sized enterprises and financial institutions.

Notes to the Financial Statements

Until 2017, in accordance with ASC 320, Investments, equity investments for which IDB Invest maintained specific ownership accounts—and for which IDB Invest did not have a controlling financial interest or significant influence—were recorded at cost less impairment, if any, or if these investments were listed and had readily determinable fair values, these investments were accounted for as available-for-sale securities at fair value with unrealized gains and losses reported in Other comprehensive income/(loss).

On January 1, 2018, IDB Invest adopted ASC 321, Investments-Equity Securities, which requires all investments in equity securities to be accounted for at fair value through the statement of income except for those investments without a readily determinable fair value (RDFV). This change applies to entities prospectively.

ASC 321 eliminates the available-for-sale securities designation for equity investments with fair value adjustments through Other comprehensive income/(loss) and requires these equity investments to be measured at fair value through the statement of income. Fair value changes related to this portfolio are recorded in Gain/(loss) from changes in fair value, net in the statement of income for the year ended December 31, 2018.

As of December 31, 2018, IDB Invest relies on the net asset value (NAV) reported by the fund managers as a practical expedient for the fair value measurement of LPs. The NAVs that have been reported by the fund manager are derived from the fair values of the underlying investments. If the NAV is not as of IDB Invest's measurement date, IDB Invest adjusts the most recent NAV, as necessary, to estimate a NAV for the investment that is calculated in a manner consistent with the fair value measurement principles. IDB Invest also records equity investments without RDFV at cost less impairment plus or minus adjustments resulting from observable price changes in orderly transactions for the identical investment or a similar investment of the same issuer. Adjustments related to impairment and observable price changes, if any, are recorded in Gain/(loss) from measurement adjustments, net in the statement of income. IDB Invest reassesses periodically whether these equity investments continue to qualify for this cost-based measurement alternative. IDB Invest may subsequently elect to measure an equity investment at fair value; such election is irrevocable, and any resulting gains or losses would be recorded in earnings at the time of election and thereafter.

Equity investments not recorded at fair value are assessed for impairment periodically based on the latest financial information, operating performance and other relevant information including macroeconomic conditions, specific industry trends, the historical performance of the company, and IDB Invest's intent to hold the investment for an extended period. When impairment is identified, the investment is written down to its fair value, which becomes the new carrying value for the investment.

Revenue recognition on equity investments – Dividends and profit participations received from equity investments not accounted for at fair value are recorded as income and reported as Dividends in the statement of income on a cash basis when dividend distributions are collected. Gains or losses on the sale or redemption of equity investments accounted for without RDFV are recorded, at disposition, as income/(loss) and reported in Gain/(loss) on sale, net in the statement of income.

For equity investments accounted for at fair value, unrealized gains and losses are recorded as Gain/(loss) from changes in fair value, net of equity investments in the statement of income. Disbursements and distributions are recorded as changes to the outstanding balance of these equity investments and reflected as such in Equity investments in the balance sheet.

Development related investments in debt securities - Debt securities in the development related investment portfolio are carried at fair value through net income or are designated in a held-to-maturity portfolio. Certain investments that meet the definition of a beneficial interest are accounted for as debt securities and carried at fair value through net income.

For the remaining portfolio, debt securities are classified as held-to-maturity and carried at amortized cost. Interest on these debt securities is included in Income from development related investments in the statement of income. Held-to-maturity debt securities are assessed for other-than-temporary impairment on a quarterly basis.

Variable interest entities - ASC 810, Consolidation, provides for consolidation when a reporting entity is the primary beneficiary of a variable interest entity (VIE), or if an entity does not meet the definitional elements of a VIE, consolidation is required if a reporting entity has a controlling financial interest and/or holds a majority

Notes to the Financial Statements

voting interest in an entity. IDB Invest has concluded that it is not the primary beneficiary for any significant VIEs. Additionally, IDB Invest does not have a significant variable interest in any VIE, which would require disclosure. Similarly, IDB Invest does not hold a controlling financial interest or majority voting interest in any other entity, and it does not have significant influence over any entities.

Revenue recognition for service fees – A series of service level agreements (SLAs) define the nature of the services and corresponding fees for services provided to the IDB. The most significant of these services relates to loan origination and servicing performed on the IDB's behalf. Revenue is recognized when services are rendered, as the corresponding fees are determinable, and collection is reasonably assured. Similarly, IDB Invest receives project administration and general administrative fees for services provided to several special purpose trust funds affiliated with IDB Invest or the IDB. Additional information about related-party transactions is included in Note 11.

Guarantees - IDB Invest offers credit guarantees covering, on a risk-sharing basis, third party obligations on loans undertaken for or securities issued in support of projects located within a member country to enhance their credit standing and enable them to complete a wide variety of business transactions. These financial guarantees are commitments issued by IDB Invest to guarantee payment performance by a borrower to a third party. IDB Invest's policy for requiring collateral security with respect to these instruments and the types of collateral security held is generally the same as for loans. Guarantees are regarded as issued when IDB Invest executes the guarantee agreement, outstanding when the underlying financial obligation of the third party is incurred and called when IDB Invest's obligation under the guarantee has been invoked. There are two obligations associated with the guarantees: (1) the stand-ready obligation to perform; and (2) the contingent obligation to make future payments. The stand-ready obligation to perform is recognized at the issuance date at fair value. The contingent liability associated with the financial guarantee is recognized when it is probable that the guarantee will be called and when the amount of the guarantee can be reasonably estimated. Any standready and contingent liabilities associated with the guarantees are included in Accounts payable and other liabilities in the balance sheet. The expense related to the contingent liability is recorded in (Provision)/release of provision for loan and guarantee losses in the statement of income. Guarantee fee income is recognized as IDB Invest is released from risk and its stand-ready obligation to perform. In the event the guarantees are called, the amount disbursed is recorded as a loan investment and specific reserves are established based on the estimated probable loss.

Borrowings - To ensure funds are available for its operational liquidity needs, IDB Invest accesses the international capital markets, offering its debt securities to investors. IDB Invest's borrowings are carried at amortized cost. The amortization of premiums and accretion of discounts is calculated following a methodology that approximates the effective interest method and is included in Borrowings expense in the statement of income.

The unamortized balance of the borrowing issuance costs related to a recognized debt liability is included as a direct deduction from the carrying amount of the debt liability in Borrowings in the balance sheet.

Interest expense on borrowings is recognized on an accrual basis and is included in Borrowings expense in the statement of income.

Fixed and intangible assets - Fixed and intangible assets (software costs) are presented at cost less accumulated depreciation and amortization and are included in Receivables and other assets in the balance sheet. Depreciation and amortization are recognized using the straight-line method over the estimated useful lives of the assets that range from three to seven years. Additional information about fixed and intangible assets is included in Note 5.

Remeasurement of foreign currency transactions - Monetary assets and liabilities denominated in currencies other than the United States dollar are recognized at the market exchange rate in effect at the transaction date or at monthly average rates. Resulting gains and losses from remeasurement are generally included in (Gain)/loss on foreign exchange transactions, net in the statement of income.

Fair value measurements - The Codification requires entities to disclose information about recurring and non-recurring fair value measurements, as well as the fair value of financial instruments.

Notes to the Financial Statements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transfer between market participants at the measurement date under current market conditions. Fair value measurement further assumes that a transaction to sell the asset or assume a liability takes place either in the principal market or, in the absence of a principal market, in the most advantageous market for the asset or liability.

In determining fair value, IDB Invest uses various valuation approaches, including market, income and/or cost approaches. The Codification establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of IDB Invest. Unobservable inputs are inputs that reflect IDB Invest's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1—Unadjusted quoted prices for identical assets or liabilities in active markets.

Assets and liabilities utilizing Level 1 inputs include investment securities that are actively traded and primarily include debt securities of the United States government and agencies.

Level 2—Valuations based on quoted prices for similar assets or liabilities in active markets; quoted prices
for identical or similar assets or liabilities that are not actively traded; or pricing models for which all
significant inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.

Assets and liabilities utilizing Level 2 inputs include investment securities that are not actively traded, and primarily include investments in obligations of banks, governments and agencies or instrumentalities other than the United States, sovereigns, local and regional governments, corporate bonds, and structured borrowings.

 Level 3—Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Assets utilizing Level 3 inputs include loans, equity investments and development related debt securities that are also measured for impairment or disclosed at fair value.

The availability of observable inputs is affected by a wide variety of factors, including, for example, the type of product, and other characteristics particular to the transaction. To the extent fair value is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3.

Fair value for the majority of IDB Invest's financial instruments is derived using pricing models. Pricing models take into account the contract terms (including maturity) as well as multiple inputs, including, where applicable, interest rate yield curves, credit spreads, creditworthiness of the counterparty, option volatility, and currency rates. In accordance with ASC 820, Fair Value Measurements (ASC 820), the impact of IDB Invest's own credit spreads would also be considered when measuring the fair value of liabilities. Where appropriate, valuation adjustments are made to account for various factors, including bid-ask spreads, credit quality, and market liquidity. These adjustments are applied on a consistent basis and are based upon observable inputs, where available.

Fair value option - The Fair Value Option (FVO) under ASC 825 permits the measurement of eligible financial assets, financial liabilities and firm commitments at fair value on an instrument-by-instrument basis, that are not otherwise permitted to be accounted for at fair value under other accounting standards. The election to use the FVO is available when an entity first recognizes a financial asset or liability or upon entering into a firm commitment. IDB Invest has elected the FVO for the following classes of financial assets: i) investments in LPs, ii) certain development related investments in debt securities that meet the definition of a beneficial interest

Notes to the Financial Statements

and iii) certain hybrid instruments in the loan portfolio. For those hybrid instruments in the loan portfolio that would have otherwise required bifurcation of the host and embedded derivative, the FVO eliminated the bifurcation requirement. The classes of financial assets elected under the FVO are measured at fair value on a recurring basis and changes in fair value of these financial instruments are included in the statement of income. Interest income on these financial instruments is recognized on an accrual basis in Interest income in the statement of income.

Loan participations - IDB Invest mobilizes funds from commercial banks and other financial institutions (Participants) by facilitating loan participations, without recourse. These loan participations are administered and serviced by IDB Invest on behalf of the Participants in exchange for a fee. Such fees are reported as Mobilization fees and other income in the statement of income. The disbursed and outstanding balances of loan participations that meet the applicable accounting criteria for sales are not included in IDB Invest's balance sheet.

Pension and postretirement benefits - The IDB Group has three defined benefit pension plans: The Staff Retirement Plan (SRP), the Complementary Staff Retirement Plan (CSRP), and the Local Retirement Plan (LRP) (the Pension Plans and LRP), covering staff of the IDB Group entities. Under the Pension Plans and LRP, benefits are based on years of service and level of compensation, and are funded by contributions from employees, IDB Invest and the IDB, in accordance with the provisions of the Pension Plans and LRP. Any and all contributions to the Pension Plans and LRP are irrevocable and are held separately in retirement funds solely for the payment of benefits under the Pension Plans and LRP.

The IDB Group also provides certain health care, tax reimbursement and other benefits to retirees. Staff who retire, receive a monthly pension from the IDB or IDB Invest, and who meet certain requirements, are eligible for postretirement benefits under the Postretirement Benefit Plan (PRBP). Retirees contribute toward the PRBP based on an established premium schedule. IDB Invest and the IDB contribute the remainder of the actuarially determined cost of future health care and other benefits. While all contributions and all other assets and income of the PRBP remain the property of IDB Invest and the IDB, they are held and administered separately and apart from the other property and assets of each employer solely for the purpose of payment of benefits under the PRBP.

Since both the IDB and IDB Invest are sponsors of the Pension Plans and the PRBP, each employer presents its respective share of these plans. The amounts presented reflect IDB Invest's proportionate share of costs, assets, and obligations of these Pension Plans and PRBP in accordance with ASC 715, Compensation - Retirement Benefits.

The service cost component of net periodic benefit costs allocated to IDB Invest is included in Administrative expenses and the other components are included in Other components of pension benefit costs, net in the statement of income. The funded status of the Pension Plans and the PRBP is included in Receivables and other assets when the respective plan is in a funded status and included in Accounts payable and other liabilities when the respective plan is in an unfunded status in the balance sheet. Additional information about the Pension Plans and PRBP is included in Note 12

Taxes - IDB Invest, its property, other assets, income, and the operations and transactions it carries out pursuant to the Agreement Establishing the Inter-American Investment Corporation are immune from all taxation and from all custom duties in its member countries. IDB Invest is also immune from any obligation relating to the payment, withholding or collection of any tax or duty in its member countries.

Accounting and financial reporting developments – In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU or Update) 2014-09, Revenue from Contracts with Customers (Topic 606), which supersedes the previous revenue recognition requirements and guidance. This new guidance does not apply to financial instruments or guarantees. Supplemental guidance has been issued in the form of additional ASUs related to the revenue recognition topic. For IDB Invest, this Update is applicable to Advisory services and other income and became effective for the 2018 annual financial statements with no material impact on IDB Invest's financial position, statement of income or cash flows.

In January 2016, the FASB issued ASU No. 2016-01 Financial Instruments-Overall: Recognition and Measurement of Financial Assets and Financial Liabilities. The changes to the previous GAAP model primarily affect accounting

Notes to the Financial Statements

for equity investments and presentation and disclosure requirements. Supplemental guidance has been issued in the form of additional ASUs related to the financial instruments' topic. For IDB Invest, this Update eliminates the available-for-sale classification for equity investments and requires that changes in fair value for equity investments with RDFVs are recorded through the statement of income. Equity investments without RDFVs are recorded at cost less any impairment plus or minus adjustments for observable price changes and are recorded as Gain/(loss) from measurement adjustments, net in the statement of income. Accounting for other financial instruments, such as loans, investments in debt securities, and other financial liabilities is largely unchanged. IDB Invest adopted this Update for the 2018 annual financial statements by means of a cumulative effect reclassification of \$2.8 million unrealized gains out of Other comprehensive income into beginning Retained earnings as of January 1, 2018 in the balance sheet.

In February 2016, the FASB issued ASU 2016-02Leases (Topic 842) and supplemental guidance has been issued in the form of additional ASUs related to the lease topic. The FASB issued these Updates to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities in the balance sheet and disclosing key information about leasing arrangements. To meet this objective, the FASB amended the Codification and created Topic 842 that supersedesTopic 840, Leases. The key change from previous US GAAP and Topic 840 is the recognition of lease assets and lease liabilities by lessees in the balance sheet under Topic 842 for those leases classified as operating leases under previous US GAAP. For IDB Invest, these Updates are effective January 1, 2019 and will not have a material impact on its financial statements.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The amendments in this Update affect entities holding financial assets and net investments in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments replace the incurred loss impairment methodology in current US GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to determine credit loss estimates. The use of forecasted information incorporates more timely information in the estimate of expected credit loss that will be more useful to users of the financial statements. Supplemental guidance has been issued in the form of additional ASUs related to the financial instruments - credit losses topic. For IDB Invest, this Update is effective in 2021. Early adoption is permitted and is under consideration for 2020. The amendments in this Update are applied through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (that is, a modified-retrospective approach). IDB Invest is currently assessing the impact that this Update will have on its financial statements.

In March 2017, the FASB issued ASU 2017-07, Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The amendments in this Update require that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net benefit cost are required to be presented in the statement of income separately from the service cost. IDB Invest adopted this Update for the 2018 annual financial statements and applied the retrospective approach for the presentation of the service cost component and the other components of net periodic pension and postretirement benefit costs for the prior period in accordance with the provisions of the Update. As a result of adopting this Update, \$19.1 million is reported as Administrative expenses for the year ended December 31, 2018, whereas previously corresponding amounts were reported as Pension plans and postretirement benefit plan expense. For the year ended December 31, 2017, IDB Invest followed the practical expedient permitted by the Update and used the amounts disclosed in Note 12 - Pension and Postretirement Benefit Plans as of December 31, 2017, for applying the retrospective presentation requirements. As a result, \$14.1 million were reclassified from Pension plans and postretirement benefit plan expense to Administrative expenses in the statement of income for the year ended December 31, 2017. The line item Pension plans and postretirement benefit plan expense has been changed to Other components of pension benefit costs, net upon adoption of this Update.

In March 2017, the FASB issued ASU 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization of Purchased Callable Debt Securities. The amendment in this Update shortens the amortization period to the earliest call date for certain purchased callable debt securities held at a premium. For

Notes to the Financial Statements

IDB Invest, this Update is effective in 2019. IDB Invest is currently assessing the impact that this Update will have on its financial statements.

In August 2018, the FASB issued ASU 2018-13 Fair Value Measurement - Changes to the disclosure requirements for fair value measurement. The amendments in this Update impact disclosure requirements for all entities that are required, under existing US GAAP, to make disclosures about recurring or nonrecurring fair value measurements. This Update eliminates, modifies, and adds to the existing disclosures. For IDB Invest, this Update is effective in 2020. IDB Invest is currently assessing the impact that this Update will have on its financial statements.

In August 2018, the FASB issued ASU 2018-14, Compensation - Retirement Benefits - Defined Benefit Plans - Changes to the disclosure requirements for defined benefit plans. The amendments in this Update impact disclosure requirements for all employers that sponsor defined benefit pension or other postretirement plans by eliminating existing disclosures that are no longer deemed to be relevant while at the same time adding new disclosures deemed to improve disclosures and clarifying existing disclosures. Among the new disclosures, the explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the period will be required. For IDB Invest, this Update is effective in 2020. IDB Invest is currently assessing the impact that this Update will have on its financial statements.

In August 2018, the FASB issued ASU 2018-15, Intangibles - Goodwill and other - Internal-use software - Customer's accounting for implementation costs incurred in a cloud computing arrangement that is a service contract. The amendments in this Update result in consistent capitalization of implementation costs of a hosting arrangement that is a service contract and implementation costs incurred to develop or obtain internal-use software and hosting arrangements that include an internal-use software license. For IDB Invest, this Update is effective in 2020. IDB Invest is currently assessing the impact that this Update will have on its financial statements.

In October 2018, the FASB issued ASU 2018-17 Consolidation (Topic 810) – Targeted Improvements to Related Party Guidance for Variable Interest Entities (VIEs). The amendments in this Update require reporting entities to consider indirect interests held through related parties under common control on a proportional basis rather than as the equivalent of a direct interest in its entirety. For IDB Invest, this Update is effective in 2020. IDB Invest is currently assessing the impact that this Update will have on its financial statements.

3. Investment Securities

The total income from Investment securities is summarized below (US\$ thousands):

	Year ended December 31							
		2018		2017				
Interests and dividends, net	\$	29,189	\$	18,100				
Net gains/(losses) on investment securities		1,549		3,762				
Other-than-temporary losses on investment securities		(628)		-				
Total	\$	30,110	\$	21,862				

The trading portfolio consists of the following (US\$ thousands):

	Dece	ember 31, 2018	December 31, 2017		
Corporate securities	\$	266,707	\$	98,679	
Government securities		70,907		41,835	
Total	\$	337,614	\$	140,514	

Net unrealized gains recognized in earnings for the year ended December 31, 2018 relating to trading securities still held as of December 31, 2018 were \$312 thousand (\$41 thousand net unrealized losses for the year ended December 31, 2017).

Notes to the Financial Statements

The fair value of available-for-sale debt securities is as follows (US\$ thousands):

Changes in available-for-sale debt securities recognized in Other comprehensive income/(loss) are as follows (US\$ thousands):

	Year ended December 31				
		2018	2017		
Unrealized gains/(losses) during the period	\$	(4,891)	\$	(113)	
Reclassification of (gains)/losses to net income		(242)		(252)	
Reclassification to net income due to impaired securities		628			
Total recognized in other comprehensive income/(loss) related to					
available-for-sale investment securities	\$	(4,505)	\$	(365)	

Sales of available-for-sale debt securities amounted to \$315.9 million during the year ended December 31, 2018 (\$186.5 million during the year ended December 31, 2017). Gross realized gains were \$534 thousand and gross realized losses were \$292 thousand from the sale of available-for-sale debt securities during the year ended December 31, 2018 (\$507 thousand gross realized gains and \$255 thousand gross realized losses during the year ended December 31, 2017).

IDB Invest maintains a strict credit policy that all investment securities must be high quality credit rated investment grade. Unrealized losses on the available-for-sale investment securities are analyzed as part of IDB Invest's ongoing assessment of other-than-temporary impairments. For available-for-sale debt securities, IDB Invest recognizes impairment losses in earnings if IDB Invest has the intent to sell the debt security or if it is more likely than not that IDB Invest will be required to sell the debt security before recovery of its amortized cost. In these circumstances the impairment loss is equal to the full difference between the amortized cost and the fair value of the securities. During the year ended December 31, 2018, IDB Invest recognized other-thantemporary impairment losses of \$628 thousand on debt securities that IDB Invest will more likely than not be required to sell before recovery of the amortized cost (none during the year ended December 31, 2017). Further, for the remainder of the securities in the available-for-sale portfolio that are in an unrealized loss position, IDB Invest has the intent and ability to hold the securities until recovery of the non-credit portion recognized in Other comprehensive income/(loss).

The maturity structure of available-for-sale debt securities is as follows (US\$ thousands):

	Decem	nber 31, 2018	December 31, 2017		
Less than one year	\$	466,233	\$	207,904	
Between one and five years		655,952		823,147	
Total	\$	1,122,185	\$	1,031,051	

Notes to the Financial Statements

4. Development Related Investments

IDB Invest has specific metrics for concentrations and monitors its development related investments for credit performance, market risk and any potential related effects of geographic or sectorial concentrations. IDB Invest's development related investments are the result of lending and investing activities that include loans, equity investments, debt securities and guarantees that promote the economic development of IDB Invest's Regional Developing Member Countries through the establishment, expansion and modernization of private enterprises. All development related investments are individually evaluated for purposes of monitoring and evaluating credit performance and market risk.

The distribution of the outstanding portfolio by country and by sector is as follows (US\$ thousands):

	 December 31, 2018							December 31, 2017

Notes to the Financial Statements

Development related investments committed but not disbursed (net of cancellations) are summarized below (US\$ thousands):

	Decer	nber 31, 2018
Loans	\$	384,735
Debt securities		69,236
Equity investments		41,566
Total	\$	495,537

Loans

Loans accrue interest at fixed and variable rates. The unpaid principal balance of the fixed rate loan portfolio amounted to \$369.5 million as of December 31, 2018 (\$184.7 million as of December 31, 2017). Variable rate loans generally reprice within one year. Base rates of variable rate loans reset at each repayment date at least annually or more frequently, but loan margins generally remain constant. In the following disclosures, IDB Invest's loan portfolio is classified as financial institutions and corporates.

An age analysis, based on contractual terms, of loans outstanding by investment type is as follows (US\$ thousands):

				De	ecemb	er 31, 2018

Notes to the Financial Statements

The recorded investment in nonaccrual loans outstanding is summarized by investment type as follows (US\$ thousands):

	December 31													
				2018			2017							
	Р		Current	Total nt nonaccrual			Past due		Current		Total naccrual			
Corporate	\$	11,836	\$	16,569	\$	28,405	\$	15,629	\$	5,314	\$	20,943		
Total nonaccrual loans	\$	11,836	\$	16,569	\$	28,405	\$	15,629	\$	5,314	\$	20,943		
Loan portfolio	\$	1,513,811					\$	958,177						
As % of loan portfolio		0.78%		1.09%		1.88%		1.63%		0.55%		2.19%		

A current nonaccrual loan is a loan that was placed in nonaccrual status where the borrower is now current on payments but for which ongoing monitoring is necessary to determine whether the borrower has sufficiently demonstrated performance before returning the loan to accrual status. Interest income collected and interest income recognized on loans in nonaccrual status was \$1.3 million for the year ended December 31, 2018 (\$33 thousand for the year ended December 31, 2017).

The investment in impaired loans as of December 31, 2018 was \$30.1 million (\$26.6 million as of December 31, 2017). The average investment in impaired loans for the year ended December 31, 2018 was \$31.3 million (\$14.2 million for the year ended December 31, 2017). The total amount of the allowance related to impaired loans as of December 31, 2018 was \$13.2 million and as of December 31, 2017 was \$13.1 million.

During 2018, there was one troubled debt restructuring for a loan classified as impaired, with an outstanding balance of \$1.6 million and specific allowance of \$1.6 million. Such loan agreement was modified to partially recover IDB Invest's outstanding exposure on the original loan and included a partial write-off of \$1.9 million. In addition, as of December 31, 2018, there is another loan in the portfolio that was considered a troubled debt restructuring in 2016 and is classified as impaired with an outstanding balance of \$2.3 million and a specific allowance for loan losses of \$2.1 million. There have been no payment defaults after the restructurings were made and these loans are considered within the impaired loans as of December 31, 2018.

The maturity structure of loans outstanding is (US\$ thousands):

		2018		2017
Due in one year or less	\$	471,115	\$	278,348
Due after one year through five years		636,524		500,199

Notes to the Financial Statements

A description of credit quality indicators and a summary of loans at amortized cost by credit quality indicator and investment type are as follows as of December 31, 2018 and 2017 (US\$ thousands):

Rating	Credit quality	Internal credit risk classification	
categories	indicator	range	Description
aa- and better	Very strong	aa- or higher	An obligor in these categories has a very strong capacity to meet its financial commitment.
a+ to a-	Strong	a+, a, a-	An obligor in these categories has a strong capacity to meet its financial commitment.
bbb+ to bbb-	Adequate	bbb+, bbb, bbb-	An obligor in these categories exhibits an adequate financial profile. However, adverse economic conditions or changing circumstances are more likely to lead to a weakening of the obligor's capacity to meet its financial obligations.
bb+ to bb-	Moderate	bb+, bb, bb-	An obligor in these categories can face major uncertainties or exposures to adverse business, financial, or economic conditions that could lead to its inadequate capacity to meet its financial obligations.
b+ to b-	Weak	b+, b, b-	An obligor in these categories is more vulnerable to nonpayment than obligations rated bb-, but the obligor currently has the capacity to meet its financial obligations. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial obligations.
ccc+ and lower	Very weak	ccc+ or lower	An obligor in these categories faces significant challenges, and default may also already be a virtual certainty. The obligor is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial obligations. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial obligations.

Loans accounted for at fair value under the FVO were \$7.7 million as of December 31, 2018 (none as of December 31, 2017). There were no changes in fair value on these loans for the year ended December 31, 2018 (none for the year ended December 31, 2017).

Equity investments

As of December 31, 2018, IDB Invest's equity investments with RDFV had a fair value of \$6.0 million. Additionally, LPs recorded at fair value based on NAV were \$46.4 million as of December 31, 2018. Net unrealized losses recognized in earnings for the year ended December 31, 2018 relating to equity investments carried at fair value and that are still held as of December 31, 2018 were \$1.0 million. IDB Invest's equity investments without RDFV

Notes to the Financial Statements

had a carrying value of \$14.2 million of which there were measurement adjustments of \$1.4 million related to observable price changes and there were no impairments for the year ended December 31, 2018.

As of December 31, 2017, IDB Invest's investments in LPs recorded at fair value based on NAV were \$30.3 million. Net unrealized gains recognized in earnings for the year ended December 31, 2017 relating to equity investments carried at fair value and that were still held as of December 31, 2017 were \$1.5 million. Equity investments classified as available-for-sale were recorded at fair value of \$5.4 million and the unrealized gains recognized in Accumulated other comprehensive income/(loss) were \$2.8 million for the year ended December 31, 2017. Equity investments carried at cost less impairment had a carrying value of \$13.0 million and there were no other-than-temporary impairment losses on these equity investments for the year ended December 31, 2017.

IDB Invest intends to hold investments in LPs until the final liquidation of the underlying assets of the LPs in order to participate fully in the performance of the LP. IDB Invest does not have redemption rights in any of these investments. IDB Invest estimates that the underlying assets of the LPs generally may be liquidated over a period of 10 years.

Debt securities

As of December 31, 2018, IDB Invest's development related investments accounted for as debt securities classified as held-to maturity were \$84.5 million (\$6.7 million as of December 31, 2017). There was no indication of other-than-temporary impairment losses on these debt securities for the year ended December 31, 2018 (none for the year ended December 31, 2017). Debt securities designated at fair value under the FVO were \$91.2 million and unrealized losses on these securities were \$12 thousand as of December 31, 2018 (no debt securities designated at fair value under the FVO as of December 31, 2017). For the year ended December 31, 2018, related interest income was \$3.4 million (\$152 thousand for the year ended December 31, 2017).

The maturity structure of development related investments in debt securities is as follows (US\$ thousands):

	Decem	Decem	December 31, 2017		
Due in one year or less	\$	442	\$	-	
Due after one year through five years		66,249		-	
Due after five years through ten years		89,367		-	
Due after ten years and thereafter		19,706		6,723	
Total	\$	175,764	\$	6,723	

Guarantees

Guarantees entered into by IDB Invest have maturities consistent with those of the loan portfolio. No notices of default have been received since inception of IDB Invest's guarantee program.

IDB Invest current outstanding exposure for guarantees was \$17.1 million as of December 31, 2018 (\$4.7 million as of December 31, 2017). The maximum potential exposure, which represents the amounts that could be lost under the guarantees in the event the full guaranteed loan disbursed and there were a total default by the guaranteed party without taking into consideration possible recoveries under recourse provisions or from collateral held or pledged, amounted to \$37.1 million as of December 31, 2018 (\$5.0 million as of December 31, 2017). The allowance for losses on guarantees is \$564 thousand as of December 31, 2018 and is recorded in Accounts payable and other liabilities in the balance sheet (\$469 thousand as of December 31, 2017).

Loan participations

As of December 31, 2018, IDB Invest serviced \$3.2 billion (\$1.8 billion as of December 31, 2017) loan participations outstanding and recognized servicing fees of \$366 thousand for the year ended December 31, 2018 (\$321 thousand for the year ended December 31, 2017) included in Mobilization fees and other income in the statement of income.

Notes to the Financial Statements

5. Receivables and Other Assets

Receivables and other assets are summarized below (US\$ thousands):

	Decem	nber 31, 2018	December 31, 2017		
Receivables and other assets	\$	15,411	\$	8,058	
Interest receivable on development related investments		14,971		7,213	
Fixed and intangible assets		12,611		9,510	
Interest receivable on investment securities		6,459		4,356	
Total receivables and other assets	\$	49,452	\$	29,137	

6. Accounts Payable and Other Liabilities

Accounts payable and other liabilities are summarized below (US\$ thousands):

	Decer	nber 31, 2018	December 31, 2017		
Pension Plans, net liability	\$	39,892	\$	38,693	
Deferred revenue		30,411		18,097	
Employment benefits payable		8,905		7,808	
Accounts payable and other liabilities		8,210		3,940	
Due to IDB, net		4,738		7,236	
Postretirement Benefit Plan, net liability		4,135		15,854	
Total accounts payables and other liabilities	\$	96,291	\$	91,628	

As of December 31, 2018 and 2017, the Pension Plans net liability and PRBP net liability reflect the underfunded status of the Pension Plans and PRBP. Refer to Note 12. Deferred revenue includes service fees collected from related parties. Additional information about IDB Invest's related party transactions is included in Note 11.

For the year ended December 31, 2018, Borrowings expense includes interest and fees expense of \$26.6 million of which \$283 thousand includes the amortization of discounts and issuance costs (\$17.0 million for the year ended December 31, 2017 of which \$279 thousand includes amortization of discounts and issuance costs).

Notes to the Financial Statements

8. Capital

IDB Invest's original authorized share capital was increased to \$705.9 million, equivalent to 70,590 shares, through a \$500.0 million general capital increase approved in 1999 (GCI-I), and several special increases. These increases allocated a total of \$505.9 million for subscriptions by new and existing member countries, with a par value and issuance price of \$10 thousand per share.

On March 30, 2015, IDB Invest's Board of Governors authorized the Second General Capital Increase (GCI-II) for \$2.03 billion. The capital increase is comprised of: (i) \$1.305 billion in capital to be paid by IDB Invest shareholders during the 2016-2022 period; and (ii) annual transfers from the IDB, on behalf of its shareholders, to be paid to IDB Invest during the period 2018-2025, totaling \$725.0 million for the entire period, and conditional upon annual approval by the IDB Board of Governors. The GCI-II increases the authorized capital stock by 125,474 shares – 80,662 shares corresponding to capital contributions payable by the countries (Annex A Shares) and 44,812 shares corresponding to transfers from the IDB on behalf of its member countries (Annex B Shares) – with a share issuance price of \$16,178.60 per share. With this capital increase, total authorized shares amount to 196,064.

All Annex A Shares have been subscribed and are expected to be paid in over time. In the balance sheet, subscribed shares are recorded as Capital, par value, Additional paid-in capital and Receivable from members on the date of the subscription instrument at the share issuance price. Payments are due on October 31 of each year from 2016 to 2022, per a payment plan determined and communicated by management to each subscribing country. The Board of Executive Directors is authorized to extend payment deadlines. The price for Annex A Shares not paid within their corresponding annual installment is adjusted to reflect a 5% increase for each year of arrears; except that, shares corresponding to the first installment which were fully paid in by the end of the second installment were not subject to a price adjustment. The price adjustment for shares in arrears is recorded to Additional paid-in capital and to Receivable from members in the balance sheet.

Capital contributions of \$289.3 million were received during the year ended December 31, 2018 for a total of \$866.8 million in contributions corresponding to Annex A Shares under GCI-II. On March 29, 2018, IDB Invest received \$49.5 million in income distributions (transfers) corresponding to Annex B Shares from the IDB on behalf of its shareholders that are also member countries of IDB Invest. Total capital contributions of approximately \$916.4 million have been received under GCI-II through December 31, 2018.

Under the Agreement Establishing the Inter-American Investment Corporation, any member may withdraw from IDB Invest, which shall become effective on the date specified in the notice but in no event prior to six months from the delivery date of such notice. Even after withdrawing, a member shall remain liable for all obligations to IDB Invest to which it was subject on the date of delivery of the withdrawal notice. In the event a member withdraws, IDB Invest and the member may agree to the repurchase of the shares of said member on terms appropriate under the circumstances. If such agreement is not reached within three months of the withdrawal notice, or within a term agreed upon between both parties, the repurchase price of the member's shares shall be equal to the book value on the date when the member ceases to belong to IDB Invest, such book value to be determined by the audited financial statements. Payment for shares shall be made in such installments, times, and currencies as IDB Invest shall determine, taking into account its financial position

Notes to the Financial Statements

 $^{^{(1)}}$ Includes Annex B shares for which income distributions (transfers) were made by IDB on behalf of its shareholders.

 $^{^{(2)}}$ Includes the amount in addition to par value for shares under GCI-II and partial payments in excess of full shares.

⁽³⁾ Represents receivable from members under GCI-II.

⁽⁴⁾ Data are rounded; detail may not add to total because of rounding.

Notes to the Financial Statements

9. Fair Value Measurements

Many of IDB Invest's financial instruments are not actively traded in any market. Determining future cash flows for fair value estimation is subjective and imprecise, and minor changes in assumptions or methodologies may materially affect the estimated values. Therefore, while disclosure of estimated fair values of certain financial instruments is required, readers are cautioned about using these data for purposes of evaluating the financial condition of IDB Invest.

The methodologies and key assumptions used to estimate the fair values of IDB Invest's financial instruments are summarized below:

Cash and cash equivalents

The carrying amount reported in the balance sheet approximates fair value.

Investment securities

Fair values for investment securities are based on quoted prices in active markets for identical assets or liabilities or prices derived from alternative pricing models when these prices are not available from market vendors. These methodologies apply to certain investments in non-U.S. government obligations, agencies, supranationals and corporate bonds. Also included are commercial paper (CP) and certificates of deposit (CD) issued under large U.S. based CP or CD programs. For investments for which prices and other relevant information, generated by market transactions involving identical or comparable assets, are not available, the income approach valuation has been employed, using yield curves, bond or credit default swap spreads, and recovery rates based on collateral values as key inputs.

Loans and development related investments in debt securities

Loans and development related investments in debt securities for which a combination of observable and unobservable inputs is generally available, require the use of estimates and present value calculations of future cash flows. All loans measured at fair value are classified as Level 3. The fair value of loans is estimated using recently executed transactions, market price quotations (where observable), and market observable credit default swap levels along with proprietary valuation models where such transactions and quotations are unobservable. The lack of objective pricing standards adds a greater degree of subjectivity and volatility to these derived or estimated fair values.

IDB Invest's loans are generally carried at the principal amount outstanding. For disclosure purposes, IDB Invest estimates the fair value of its loan portfolio including impaired assets. Any excess or deficit resulting from the difference between the carrying amounts of the loan portfolio and the fair value disclosed does not necessarily reflect the realizable values since IDB Invest generally holds investments to maturity with the aim of realizing their contractual cash flows.

Equity investments

IDB Invest purchases the share capital of eligible private sector enterprises and also invests in LPs. In most cases, market prices are not available, and alternate valuation techniques require a significant degree of judgment.

Equity investments with RDFVs (formerly Available-for-sale direct equity investments) - Equity investments are valued using quoted prices.

Equity investments without RDFVs (includes Equities at NAV) – IDB Invest's methodology to measure the fair value of equities without RDFVs requires the use of estimates and present value calculations of future cash flows for impairments and/or observable price change adjustments. IDB Invest relies on third-party valuation specialists when available, internal estimates, or a combination of both. IDB Invest also relies on the NAV as a practical expedient as reported by the fund manager for the fair value measurement of its LPs. The NAVs that have been reported by the fund manager are derived from the fair values of the underlying investments. If the NAV is not as of IDB Invest's measurement date, IDB Invest adjusts the most recent NAV, as necessary, to estimate a NAV for the investment that

Notes to the Financial Statements

is calculated in a manner consistent with the fair value measurement principles. IDB Invest intends to hold investments in LPs until the final liquidation of the underlying assets of the LPs in order to participate fully in the performance of the LP. IDB Invest does not have redemption rights in any of these investments.

Borrowings

IDB Invest's borrowings are recorded at amortized cost. The fair value of IDB Invest's borrowings is estimated using either quoted market prices or discounted cash flow analyses based on IDB Invest's current borrowing rates for similar types of borrowing arrangements and includes all of IDB Invest's borrowings.

Other assets and liabilities

The carrying value of financial instruments included in Receivables and other assets, and Accounts payable and other liabilities approximates fair value due to their liquid or short-term nature.

Fair value of financial instruments

IDB Invest's financial instruments recorded or disclosed at fair value have been categorized based on a fair value hierarchy in accordance with ASC 820 and are as follows (US\$ thousands):

	Balance as of Dec. 31, 2018	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Recurring (R) Nonrecurring (N) Disclosure only (D) ⁽¹⁾

There were no transfers between levels during the years ended December 31, 2018 nor December 31, 2017.

Notes to the Financial Statements

10. Contingencies

In the ordinary course of business, IDB Invest is defendant, codefendant or party in various litigation matters inherent to and typical of the operations in which it is engaged. In the opinion of IDB Invest's management, the ultimate resolution of these legal proceedings would not have a material adverse effect on the financial position, results of operations, or cash flows.

11. Related Party Transactions

IDB Invest and the IDB entered into SLAs whereby IDB Invest provides certain services to the IDB and the IDB provides certain services to IDB Invest. These services are further described below.

Service Level Agreements

The SLAs with the IDB outline the duration, scope of work, roles and responsibilities, remuneration, and performance metrics of each institution.

Co-financing Arrangements and SLA Revenue

Following the IDBG private sector and non-sovereign guaranteed (NSG) reorganization, all new NSG activities are originated by IDB Invest and largely co-financed by IDB Invest and the IDB. IDB Invest and the IDB maintain separate legal and economic interests in their respective share of the loan principal balance for a co-financed loan. IDB Invest's portion is defined as a percentage of the overall transaction subject to certain minimum amounts as agreed between IDB Invest and the IDB.

IDB Invest earns revenue from an annual renewable SLA under which IDB Invest provides loan origination, credit risk evaluation and monitoring, and certain loan administration services for the IDB related to its private sector operations including operations that are co-financed by IDB Invest and IDB. IDB Invest also provides certain advisory services to the IDB Group. IDB Invest recognized revenue of \$74.5 million for providing services related to these performance obligations for the year ended December 31, 2018 (\$63.7 million for the year ended December 31, 2017). These amounts are included in Service fees from related parties in the statement of income.

SLA Expenses

IDB Invest purchases various general and administrative services from the IDB under a series of annual renewable SLAs. IDB Invest incurred expenses of \$12.8 million for receiving these SLA services from the IDB for the year ended December 31, 2018 (\$11.2 million for the year ended December 31, 2017) that are included in Administrative expenses in the statement of income. Payables related to these SLA expenses are included in the total due to IDB of \$4.7 million as of December 31, 2018 (\$7.2 million as of December 31, 2017). Refer to Note 6.

Office Space

IDB Invest has entered into office space leases with the IDB at headquarters and in its Regional Developing Member Countries. Expenses incurred for these leases amounted to \$4.6 million for the year ended December 31, 2018 (\$4.1 million for the year ended December 31, 2017). The current lease agreement with the IDB at headquarters will expire in 2020. The remaining current lease agreements with the IDB in the Regional Developing Member Countries are renewed annually with the exception of the Argentina, Brazil and Colombia offices which extend between 2019 and 2022.

Notes to the Financial Statements

Expected payments under the current lease agreements with the IDB are as follows (US\$ thousands):

	2019		 2020	2021	2022	
Office space	\$	5,305	\$ 5,203	\$ 216	\$	49
Total	\$	5,305	\$ 5,203	\$ 216	\$	49

Other Transactions with Related Parties

Since 1997, IDB Invest has maintained a renewable credit facility with the IDB amounting to \$300.0 millionOn September 21, 2018, this renewable credit facility was modified from a United States dollar facility to a multicurrency facility and the original expiration date of November 2020 was modified and extended to December 2022. As of December 31, 2018, IDB Invest's borrowings outstanding from the IDB multi-currency credit facility were \$131.0 million and \$169.0 million remain available. Refer to Note 7.

Management of External Funds

IDB Invest administers on behalf of other related party entities, which include donors and member countries, funds restricted for specific uses that include the co-financing of certain projects, technical studies for borrowers, project-related studies, and research and training programs. These funds are held in trust by IDB Invest and are not commingled with IDB Invest's funds, nor are they included in the assets of IDB Invest. IDB Invest receives a management fee that is generally a percentage of the funds received. For the year ended December 31, 2018, IDB Invest earned \$2.1 million for managing external funds (\$2.5 million for the year ended December 31, 2017). These fees are included in Service fees from related parties in the statement of income.

Access to IDB Administered Funds

In addition to the aforementioned funds, IDB Invest provides certain services for trust funds administered by the IDB on behalf of the trust fund donors (the Trust Funds). IDB Invest receives an allocation of the IDB's related Trust Fund fees. Such fees are intended to cover internal and external costs associated with administering the NSG activities for the Trust Funds and related operations over the expected lives of the Trust Funds and the underlying operations that range from 15 to 25 years. Costs expected to be incurred approximate the allocable fee. The Trust Fund organizational documents provide for either the payment of a lump sum or scheduled payments. The timing of the payments may not correspond to the incurrence of the related costs.

For the year ended December 31, 2018, the IDB remitted payments of \$5.4 million for these services (\$1.9 million for the year ended December 31, 2017). For the year ended December 31, 2018, IDB Invest recognized revenue related to providing services of \$2.3 million (\$1.8 million for the year ended December 31, 2017). As of December 31, 2018, IDB Invest has recorded deferred revenue of \$12.8 million related to these services (\$9.7 million as of December 31, 2017), which will be recognized as revenue as services are provided. Deferred revenue is presented as a component of Accounts payable and other liabilities in the balance sheet.

12. Pension and Postretirement Benefit Plans

Both the IDB and IDB Invest are sponsors of the Pension Plans and PRBP and each employer presents its respective share of these plans using a December 31 measurement date. IDB Invest recognizes actuarial gains and losses on the Pension Plans and the PRBP through Other comprehensive income/(loss) at the end of each calendar year, when the pension liabilities are remeasured.

Notes to the Financial Statements

Obligations and funded status

IDB Invest uses a December 31 measurement date for the Pension Plans and the PRBP. The following table summarizes the change in benefit obligation, change in plan assets, funded status of the Pension Plans and the PRBP, and the amounts recognized in the balance sheet (US\$ thousands):

		Pensio	n Pla	ans	PRBP			
		2018		2017		2018		2017
Reconciliation of benefit obligation								
Obligation as of January 1	\$	(226,252)	\$	(181,602)	\$	(152,806)	\$	(115,988)
Service cost		(13,551)		(9,668)		(5,586)		(4,454)

Prior service costs		-		-		(2,273)		(2,621)
Net amount recognized as of December 31	\$	17,667	\$	22,549	\$	14,018	\$	25,585

The accumulated benefit obligation attributable to IDB Invest for the Pension Plans, which excludes the effect of future salary increases was \$183.7 million and \$181.6 million as of December 31, 2018 and 2017, respectively.

Notes to the Financial Statements

Components of net periodic benefit cost

Net periodic benefit cost recognized in Pension Plans and PRBP expense in the statement of income consists of the following components (US\$ thousands):

		Pensio	ns	PRBP				
	2018			2017		2018		2017
Service cost ⁽¹⁾	\$	13,551	\$	9,668	\$	5,586	\$	4,454
Interest cost (3)		7,900		7,291		5,105		5,000
Expected return on plan assets ⁽²⁾⁽³⁾ Amortization of: ⁽³⁾		(10,178)		(9,283)		(7,399)		(6,808)
Unrecognized net actuarial loss		1,388		292		1,304		1,023
Prior service (credit)/cost		-		-		(426)		(426)
Net periodic benefit cost	\$	12,661	\$	7,968	\$	4,170	\$	3,243

⁽¹⁾ Included in Administrative expenses.

Other changes in plan assets and benefit obligations recognized in Other comprehensive income/(loss) (US\$ thousands):

		Pension Plans						
	Year ended December 31							
		2018		2017		2018		2017
Net actuarial (gain)/loss	\$	(3,494)	\$	9,364	\$	(10,611)	\$	14,679
Current year prior service (credit)/cost		-		-		(78)		-
Amortization of:								
Unrecognized net actuarial loss		(1,388)		(292)		(1,304)		(1,023)
Prior service (credit)/cost		-		-		426		426
Total recognized in Other comprehensive								
(income)/loss	\$	(4,882)	\$	9,072	\$	(11,567)	\$	14,082
Total recognized in Net periodic benefit cost and								
Other comprehensive (income)/loss	\$	7,779	\$	17,040	\$	(7,397)	\$	17,325

The estimated amounts that will be amortized from accumulated other comprehensive income into net periodic benefit cost during 2019 are actuarial losses of \$28 thousand for the Pension Plans and net prior service credits of \$151 thousand for the PRBP.

 $^{^{(2)}}$ The expected return of plan assets is 6.00% in 2018 and 6.25% in 2017.

⁽³⁾ Included in Other components of pension benefit costs, net.

Notes to the Financial Statements

Actuarial assumptions

The actuarial assumptions used in the Pension Plans and PRBP valuations are based on financial market interest rates, past experience, and management's best estimate of future benefit changes and economic conditions. Changes in these assumptions will impact future benefit costs and obligations. Actuarial gains and losses occur when actual results are different from expected results. Actuarial gains and losses recognized in Accumulated other comprehensive income, which exceed 10% of the greater of the benefit obligation or market-related value of the plan assets at the beginning of the period, are amortized to income over the average remaining service period of active participants expected to receive benefits under the Pension Plans and PRBP, which is approximately 12.0 and 13.9 years, respectively.

Unrecognized prior service credit is amortized between 7.0 years and 8.5 years for the PRBP.

The weighted-average assumptions used to determine the benefit obligation and the net periodic benefit cost were as follows:

	Pensio	n Plans	PR	ВР
	2018	2017	2018	2017
Weighted average assumptions used to determine benefit obligation as of December 31				
Discount rate	4.17%	3.54%	4.22%	3.61%
Inflation rate	2.21%	2.20%	2.21%	2.20%
Rate of compensation increase	4.27%	4.14%		

	Pensio	n Plans	PR	ВР
Weighted average assumptions used to determine net periodic	2018	2017	2018	2017
benefit cost for years ended December 31				
Discount rate	3.54%	4.06%	3.61%	4.16%
Expected long-term return on plan assets	6.00%	6.25%	6.00%	6.25%
Rate of compensation increase	4.14%	4.15%		

The expected long-term return on the Pension Plans and PRBP's assets represents Management's best estimate, after surveying external investment specialists, of the expected long-term (10 years or more) forward-looking rates of return of the asset categories employed by the Pension Plans and PRBP, weighted by the Pension Plans and PRBP's investment policy asset allocations. Accumulated and projected benefit obligations are measured as the present value of expected payments. The discount rate used is selected in reference to the year-end yield of AA corporate bonds within the approved Financial Times Stock Exchange Pension Liability Index, with maturities that correspond to the payment of benefits. For the assumed rate of inflation, IDB Invest has established a process by which a range of inputs is reviewed, including 10-year forward looking expert opinion forecasts, the average of the 10 year and 30 year U.S. Treasury Inflation Protected Securities (U.S. TIPS) breakeven inflation rate, and historical averages.

Notes to the Financial Statements

For participants assumed to retire in the United States, the accumulated postretirement benefit obligation was determined using the following health care cost trend rates at December 31:

	PR	BP
	2018	2017
Health care cost trend rates assumed for next year		
Medical, Non-Medicare	5.00%	5.50%
Medical, Medicare	3.00%	3.25%
Prescription drugs	7.00%	8.00%
Dental	4.50%	4.50%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)		
Medical, Non-Medicare	4.50%	4.50%
Medical, Medicare	2.50%	2.50%
Prescription drugs	6.00%	6.00%
Dental	4.50%	4.50%
Year that the rate reaches the ultimate trend rate	2021	2021

For those participants assumed to retire outside of the United States, a 6.50% and 7.00% health care cost trend rate was used for 2018 and 2017, respectively with an ultimate trend rate of 4.50% in 2023.

Assumed health care cost trend rates have a significant effect on the amounts reported for the PRBP. A one-percentage-point change in assumed health care cost trend rates would have the following effects (US\$ thousands):

	Year ended December 31									
	One-percentage- point increase				One-percentage- point decrease			age-		
								ase		
	2018		2017		2018		2017			
Effect on total of service and interest cost components	\$	2,711	\$	3,028	\$	(1,895)	\$	(2,099)		
Effect on postretirement benefit obligation		33,244		39,988		(23,892)		(28,487)		

Pension Plans and PRBP Assets

The assets of the Pension Plans and the PRBP are managed primarily by investment managers engaged by the IDB who are provided with investment guidelines that take into account the Pension Plans and PRBP investment policies. Investment policies with long-term strategic asset allocations have been developed so that there is an expectation of sufficient returns to meet long-term funding needs. The policies allocate 65% of the Pension Plans portfolio to growth-oriented assets (the Return Strategies), and 35% of assets to nominal and inflation-indexed U.S. fixed income (the Liabilities Hedging Strategies), to partially hedge the interest rate and inflation exposure in the Pension Plans and PRBP's liabilities, and to protect against disinflation.

In 2017, the Pension and the Managing Committees of the Pension Plans and PRBP approved new Investment Policy Statements (IPS). The two new IPS comply with the IDB's Risk Appetite (RA) and Long-term Funding (LTF) policies. The two new IPS Strategic Asset Allocations (SAA) include three new asset classes (Public Infrastructure, Private Infrastructure and Tactical Asset Allocation), and eliminate Commodities. The new SAAs will be implemented after appropriate investment vehicles have been legally contracted, over the next 12 months.

Notes to the Financial Statements

The IPS SAA target allocations as of December 31, 2018, are as follows:

	Pension Plans	PRBP
U.S. equities	20%	20%
Non-U.S. equities	18%	18%
Emerging markets equities	4%	4%
Public real estate	3%	3%
Long duration diversified fixed income	27%	27%
Core fixed income	4%	4%
High yield fixed income	2%	2%
U.S. inflation-indexed fixed income	4%	4%
Emerging markets fixed income	3%	3%
Private real estate	5%	5%
Public Infrastructure	2%	2%
Private Infrastructure	3%	3%
Tactical Asset Allocation	5%	5%
Commodity index futures	0%	0%
Short-term fixed income funds	0%	0%
Stabilization Reserve Fund:		
Core fixed income	50%	50%
U.S. inflation-indexed fixed income	0%	0%
Short-term fixed income funds	50%	50%

Investment and asset class risk is managed by the continuous monitoring of each asset category level and investment manager. Investments are rebalanced monthly within policy targets using cash flows and rebalancing exercises. Investment managers are generally not allowed to invest more than 5% of their respective portfolios in the securities of a single issuer other than the U.S. Government. The use of derivatives by an investment manager for the Pension Plans and PRBP is limited, and subject to specific approval by the Managing Committees of the Pension Plans and PRBP.

For the Pension Plans (SRP and CSRP) and PRBP, the included asset classes are described below:

- U.S. equities For the Pension Plans and PRBP, commingled funds that invest, long-only, in U.S. common stocks. Management of the funds replicates or optimizes the all capitalization (cap) Russell 3000 Index, for the SRP and PRBP only, approximately 5% of U.S. equities assets are managed in separate accounts holding individual stocks;
- Non-U.S. equities For the Pension Plans and PRBP, commingled funds that invest, long-only, in non-U.S. common stocks. Management of the funds replicates or optimizes the large/mid-cap MSCI EAFE Index; for the SRP and PRBP only, 60% of non-U.S. equities assets are actively-managed in separate accounts holding individual stocks;
- Emerging markets equities For the Pension Plans, an actively-managed commingled fund that invests, long-only, in emerging markets common stocks. Management of the fund selects securities, based upon fundamental characteristics, which are generally comprised within the large/mid-cap MSCI Emerging Markets Free Index; for the SRP and PRBP, an actively-managed commingled fund and an actively managed mutual fund that invest, long-only, in emerging markets common stocks. Management of the fund optimizes the large/mid-cap MSCI Emerging Markets Free Index;

Notes to the Financial Statements

- Public real estate equities For the SRP and PRBP, individual (separate) account which holds, long-only, real estate securities. The account is actively-managed based upon fundamental characteristics, investing in securities generally comprised within the MSCI U.S. REIT Index;
- Long duration diversified fixed income For the SRP and PRBP, long duration fixed income assets are invested in separate accounts holding individual bonds generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index. Management of the fund invests in securities generally comprised within the Bloomberg Barclays U.S. Long Government/Credit Bond Index;
- Core fixed income For the Pension Plans and PRBP, actively- managed commingled funds that invest, long-only, in intermediate duration government and credit securities. Management of the funds select securities, based upon fundamental characteristics, which are generally comprised within the Bloomberg Barclays U.S. Aggregate Bond Index;
- High yield fixed income For the SRP, assets are invested in individual securities, and for the PRBP, actively
 managed commingled fund. For both plans, the investible universe is generally comprised of the securities
 within the Bloomberg Barclays High Yield 2% Constrained Index, as well as opportunistic investments in
 non-index securities. High yield securities are financial obligations of U.S. companies, rated below
 investment-grade by at least one of the nationally recognized statistical rating organizations;
- U.S. inflation-indexed fixed income For the Pension Plans and PRBP, investment in individual U.S. TIPS in accounts managed internally. Management of the funds replicates or optimizes the Bloomberg Barclays US Treasury Inflation Notes 10+ Years Index;
- Emerging markets fixed income For the Pension Plans and PRBP, actively-managed commingled funds that invest, long-only, in emerging markets fixed income. The funds invest in sovereign and sub-sovereign United States dollar- and local-denominated debt. Management of the fund invests in securities generally comprised within the J.P. Morgan EMBI Global Diversified Index;
- Private real estate For the Pension Plans and PRBP, an open-end commingled funds which invests, longonly, in U.S. real estate properties. The fund is actively-managed based upon fundamental characteristics of the properties;
- Public Infrastructure For the SRP and PRBP only, commingled funds and individual securities that invest, long-only, in U.S. and developed markets common stocks, within the infrastructure sector.
- Private Infrastructure For the SRP and PRBP only, an open-end commingled fund which invests, longonly, U.S. and developed markets private equity within the infrastructure sector, this new asset class is not implemented yet.
- Tactical Asset Allocation For the SRP and PRBP only, commingled funds that invest in U.S. and developed
 markets equities and fixed income, investments could shift due to opportunistic behavior within equities
 and fixed income.
- Commodity index futures For the CSRP, investment in a commingled fund that invests, long-only in commodity index futures, management of the fund replicates or optimizes the Bloomberg Commodity Index.
- Short-term fixed income funds Commingled fund that invests, long-only, in U.S. Government securities with maturities of less than 18 months. Management of the fund invests in short-term government securities only, and it is benchmarked against the Merrill Lynch 3-month Treasury Bill Index.

Effective December 2015, the IDB Board of Executive Directors approved the Long-Term Funding Policy for the Pension Plans (SRP and CSRP) and the PRBP that established stable contribution rates of 20% (SRP), 0.71% (CSRP) and 12% (PRBP) for a five-year initial term. IDB Invest adopted the use of the stable contribution rates effective January 1, 2016. IDB Invest contributions made in excess (deficit) of the actuary's theoretical contribution rate are allocated (withdrawn) to (from) the Stabilization Reserve Funds (Reserve Funds). The

Notes to the Financial Statements

approved Investment Policy Strategic Asset Allocation for the Reserve Funds is 50% cash and 50% Core Fixed Income.

The following tables set forth the investments of the Pension Plans and the PRBP as of December 31, 2018 and 2017, which are measured at fair value and presented together with their weighted average allocation, by level within the fair value hierarchy. As required by the fair value measurements accounting framework, these investments are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Investments in funds that do not have a readily determinable fair value are measured at NAV as a practical expedient and are not classified within the fair value hierarchy (US\$ thousands).

⁽¹⁾ Includes receivables and payables carried at amounts that approximate fair value.

Investment securities that are measured at fair value based on quoted market prices in active markets, a valuation technique consistent with the market approach, include U.S., non-U.S., and public real estate individual equity holdings, fixed income mutual funds, U.S. treasury and U.S. inflation-indexed bonds and short-term investment securities. Such securities are classified within Level 1 of the fair value hierarchy.

Investment securities that are measured at fair value based on quoted market prices for similar assets in active markets, or quoted prices for identical or similar assets in markets that are not active, a valuation technique consistent with the market approach, include corporate, non-U.S. government, high yield and municipal bonds, and commercial mortgage backed securities. Also included are proprietary investment managers' commingled funds investing in U.S. and global equities, emerging markets debt, fixed income funds, and/or short-term debt investments. These commingled funds are not publicly traded and are measured at fair value based on the net asset per share, which are determined and published and are the basis for current transactions. Such securities are classified within Level 2 of the fair value hierarchy.

Proprietary investment managers' funds investing in private real estate do not have RDFVs and are measured at the NAV as a practical expedient. Such investments are not classified within the fair value hierarchy.

Contributions

Contributions from IDB Invest to the Pension Plans and the PRBP during 2019 are expected to be approximately \$6.8 million and \$3.9 million, respectively. All contributions are made in cash.

Notes to the Financial Statements

Estimated future benefit payments

The following table summarizes the benefit payments, which reflect expected future service, as appropriate, expected to be paid in each of the next five years and in the aggregate for the subsequent five years. These amounts are based on the same assumptions used to measure the benefit obligation as of December 31, 2018 (US\$ thousands).

	Pension Plans		 PRBP
Estimated future benefit payments			
January 1, 2019 - December 31, 2019	\$	4,089	\$ 1,389
January 1, 2020 - December 31, 2020		4,425	1,526
January 1, 2021 - December 31, 2021		4,736	1,680
January 1, 2022 - December 31, 2022		5,092	1,847
January 1, 2023 - December 31, 2023		5,630	2,042
January 1, 2024 - December 31, 2028		37,779	14,260

13. Subsequent Events

Management has evaluated subsequent events through March 5, 2019, which is the date the financial statements were issued. Management determined that there are no subsequent events that require disclosure under ASC Topic 855, Subsequent Events.
