

ESMS in Practice

Turn theory into action.

A practical, expert-led course on Environmental and Social Management Systems for financial institutions in Latin America and the Caribbean.

Why E&S Risk Management Matters.

Financial institutions increasingly face environmental and social risks across their portfolios.

A robust ESMS helps identify risks, strengthen decision-making, meet stakeholder expectations, and create long-term value.

Risk Management

Identify and manage environmental and social risks before they become issues.

Portfolio Quality

Support stronger lending decisions and improve portfolio resilience.

Market Expectations

Respond to evolving sustainability requirements and stakeholder expectations.

Business Value

Create opportunities for clients while supporting sustainable development.

Environmental & Social Risks Across Sectors

Environmental and social risks can look different across sectors, but good risk management principles apply everywhere.

This course uses real-world examples to build practical skills you can apply to your institution and clients.

Explore environmental and social risks through practical examples from key sectors in the region.

Agribusiness

Land use, biodiversity, labor conditions, water use, and community impacts.

Infrastructure

Community health and safety, resettlement, biodiversity, and climate resilience.

Energy

Emissions, resource use, biodiversity, and community and worker safety.

Manufacturing

Emissions, waste and effluents, worker health and safety, and resource efficiency.

Tourism

Cultural heritage, water and energy use, waste management, and community impacts.

SMEs

Operational risks, supply chain practices, labor management, and local impacts.

Different sectors. Common goal: **manage risks, protect people and the planet, and create long-term value.**

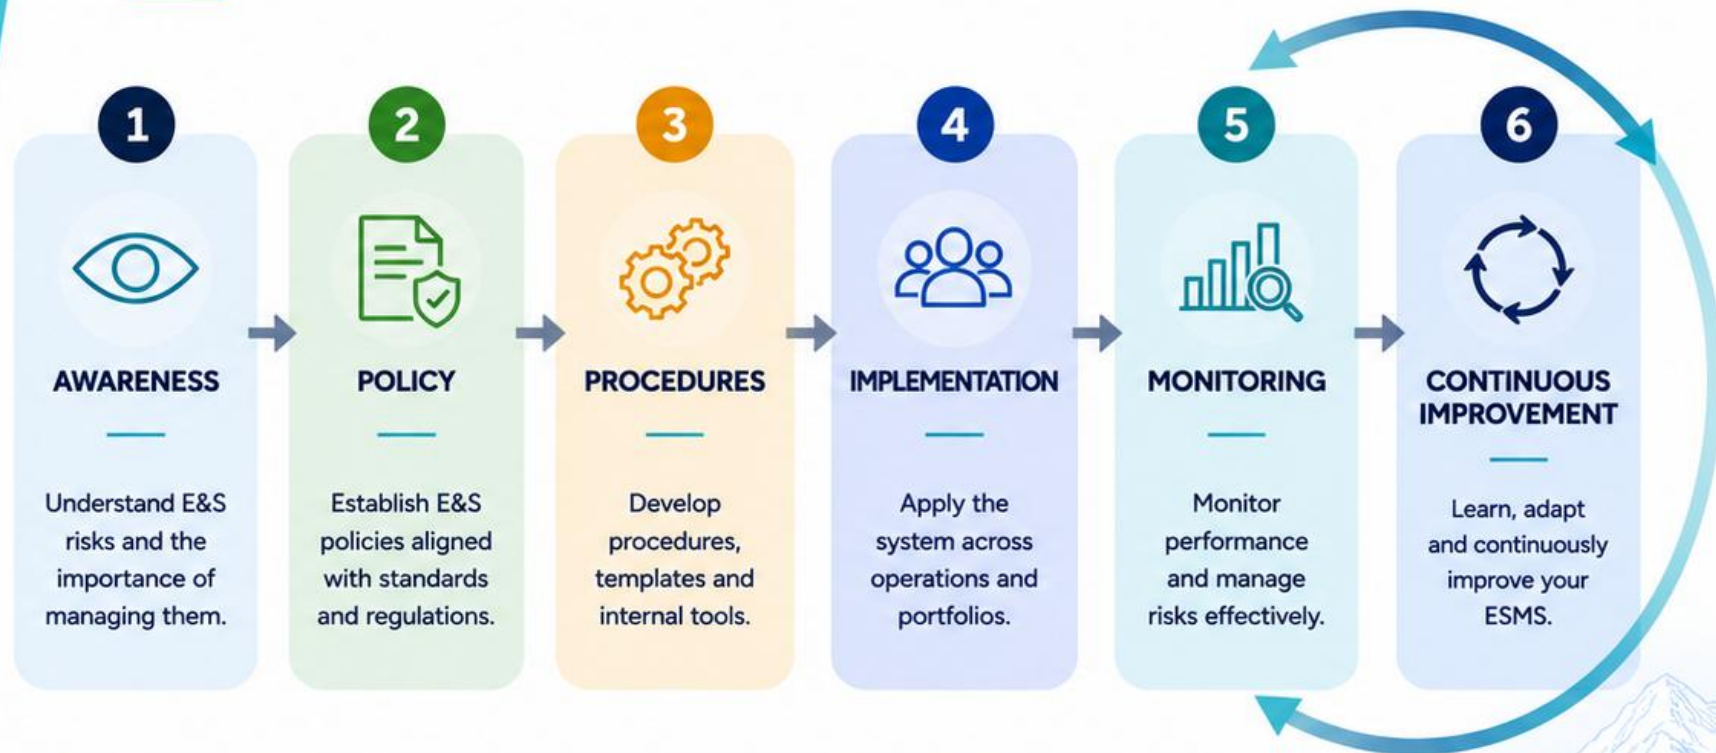

The SARAS Journey.

ESMS in Practice supports institutions at every stage of their Environmental and Social Management System maturity.

Stronger systems.
Better decisions.
Greater impact.

Where is your institution in the ESMS journey?

ESMS in Practice provides the **knowledge, tools, and support** to advance at **every stage**.

Practical Tools. Real Impact.

Actionable resources to strengthen Environmental and Social performance.

ESMS eLearning Platform

Interactive courses and practical learning paths.

Guides & Templates

Step-by-step tools for every stage of implementation.

Community of Practice

Connect, share experiences and learn from peers.

Two learning tracks. One goal: stronger E&S management.

Choose the path that fits your
role and dive as deep as
you need.

GENERAL TRACK 4 Modules
