

This is a **category III** project according to IIC's environmental review procedure.

Each subproject will be subject to an environmental review and must comply with the environmental, labor, and safety laws, regulations and standards of Honduras as well as the IIC's environmental and labor policies. In order for the Bank to acquire a thorough, consistent knowledge of IIC requirements, it will receive an environmental orientation visit as required and it will be required by contract to attend the IIC's environmental training seminar. Both the orientation visit and the seminar will provide a basis for the recognition of environmental, safety, and labor issues as well as their respective IIC policy requirements.
