

This is a category III project according to the IIC's environmental and labor review procedure because it could produce certain effects that may be avoided or mitigated by following generally recognized performance standards, guidelines, or design criteria.

The companies whose projects are financed with funding from the Fund will be subject to an environmental and labor review consistent with IIC's requirements and with internationally recognized and national environmental and labor laws, regulations, and standards. The Fund is committed to meet the IIC's environmental and labor procedures and guidelines, and will abide by the IIC's list of excluded activities. To become proficient with the application of the IIC's environmental and labor requirements, members of the Fund's management team agreed to attend one of the environmental training workshop organized annually by the IIC.
